Subject: his property at former Wilcox Refinery	
Discussion: <p>Spoke with Mr. (b) (6) concerning ground water usage and possible air/soil contamination. He has an active well on his property but he does not use it because the water has a high gasoline (petroleum) content. He says the contamination is occurring in the 45-Foot aquifer that is saturated with hydrocarbons. The 85-Foot aquifer, in which the well is screened, is clean he says. Mr. (b) (6) also informed me that well is not sealed off and can be easily utilized. Mr. (b) (6) son and his wife live in the residence at the site; they are on City (Bristow) water.</p> <p>Mr. (b) (6) other complaints were that it took him 15 years to grow a tree on the property and an impoundment that he believes contains an acid-laced sludge. He says the sludge will deteriorate anything.</p>
